Fishbein, Morris. THE NATIONAL NUTRITION. Bobbs-Merrill co. (1942)
192 p., tables. 389.1 F52N

In the book "The National Nutrition," Dr. Fishbein covers everything from the National Nutrition Conference for Defense through such topics as food, weight control, and hygiene of food. Much of the material is so general that it does not seem to be pointed at any particular group. Part of it is fairly technical, and part is definitely for the lay reader. Some of it seems to be for physicians, some for the housewife, and some for home economists. There is good common sense in much of what is said. There are also amusing passages in the book. The chapter on the hygiene of food brings out a phase which is frequently overlooked. The information on weight control and food fads should certainly be more widely known.

Taylor, Demetria. THE NUTRITION HANDBOOK: A COMPLETE GUIDE TO THE NUTRITIONAL CONTENT OF THE FOOD WE EAT. Doubleday, Doran and co., 1942. 231 p.
389.1 T214

This is a cleverly written book for the housewife. The language is non-technical and the material is well-organized. The vitamins, minerals, proteins and energy foods are taken up separately. The use of these food elements in the body is discussed, the recommended allowance is given, and foods to supply these needs are listed. Sample menus are given. These menus do not fit into the rationing program, but are rather practical in other respects. Brief, but very pertinent, chapters on acidosis and food fads are included. The untrained housewife should be able to get good help from this book. Many of the confusing questions on nutrition are answered in a simple, understanding way. The style is entertaining, and makes easy reading.—Myra Reagan, Regional Nutritionist, Food Distribution Administration, Atlanta Regional Office.
